BARESTONE

Cemintel Barestone prefinished panels provide a raw, contemporary finish for internal and external applications.

Barestone™ External

Its biophilic impression enhances design aesthetics, as it weathers naturally and seamlessly blends into its environment. Barestone™ External can be used in many diverse ways and cut to different shapes and sizes for dramatic design effect.

Barestone™ Internal

The panels have a stain resistant coating applied and are simply installed internally by split battens, adhering to timber battens, or alternatively, and for a more industrial look, exposed fixing.
