general
purpose

contemporary interiors

Take a modern approach to creating exceptional spaces in your home, business, showroom or commercial premises. With the Easycraft range of distinctively contemporary wall and ceiling profiles, you can create stunning effects that lift your work and living environments out of the everyday, bringing your design ideas to brilliantly individual life.

general
purpose

ascot range

Give authentic distinction to any room: especially formal dining rooms, master suites, hallways or entry foyers. Combine with an easydado rail, for infinite elegance. Pre-primed with an industrial grade undercoat on both sides, for quick and easy final coat application. The more contemporary ascot.Vogue series presents a sophisticated, well-defined profile.

General Purpose

Wet Area

Hoop Pine

Feature Blackbutt

American Walnut

American Oak

Primed, Ready to Paint

Supplied Raw or with Lacquer Finished Applied

wet area

wet areas. inside and out

Recommended for high-moisture interior spaces like bathrooms, laundries and kitchens, and semi-external (undercover) walls and ceilings. Durable, versatile, made from 9.5mm reconstituted hardwood, and available in a wide range of profile finishes. It's extremely hardy and looks good too.

easycraft. flair and function combined

Australian Made

All our raw materials are produced by Australian manufacturers, with processing and painting also handled locally. Our national sales and distribution network ensures quick and easy access to Easycraft products for any renovation, extension, residential or commercial construction site across Australia.

Efficient and Cost Effective

Easycraft panels are available in a range of convenient sizes, limiting on-site cutting, so there's considerably less waste, less mess and lower labour costs.

It's three times faster to install Easycraft pre-primed panels than primed plasterboard – twenty times faster when finishing and drying time is taken into account.

And it's approximately the same cost as supplied and installed plasterboard.

When using traditional lining boards, a carpenter needs eight to nine boards compared with one sheet of Easycraft. That adds up to significantly less installation time, plus less time for patching and painting afterwards.

Ease of Installation

Easycraft's unique easyjoin system* ensures a fuss-free process, making us the preferred choice for DIY jobs at home. On commercial projects and large scale renovations, our products are quickly and easily installed by carpenters, plastering or joinery contractors.

Easy to Finish

Choose Easycraft and you'll effectively reduce labour time on-site by up to a third. Our products are precision manufactured and pre-primed, with a quality commercial grade primer, ready to paint. We also offer alternative finishing options for our veneer range, including a clear and white wash lacquer coat, ready to install.

Tough and Impact Resistant

300% more impact resistant than standard plasterboard, 50% better than impact-resistant plasterboard – making Easycraft panels the right choice for corridors, foyers, classrooms, offices, shops and restaurants, games rooms and garages.
