Window Winders

Contents

Cyl4® *One Key Security*

CYL4® is a patented innovation that allows ASSA ABLOY window locks and patio bolts to be keyed to door locks that use the most common key type (C4), thus providing customers with the added convenience of having to use only one key around the home.

Most Australian door locks are operated by a C4 key.
Traditional window locks are incompatible with a C4 key. Therefore homeowners are required to carry at least one key for their door locks, and a different key (or keys) for their window locks.

The introduction of ASSA ABLOY's unique CYL4® technology has revolutionised home locking security. Our CYL4® window lock and chainwinder ranges incorporate the patented CYL4® cylinder, which is quickly and easily keyed alike to your customer's 5 pin C4 door key.
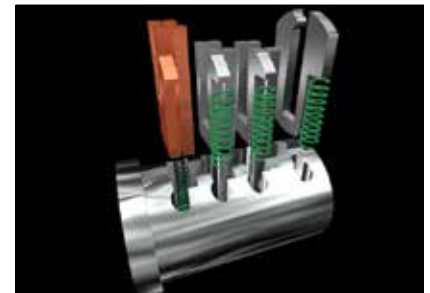

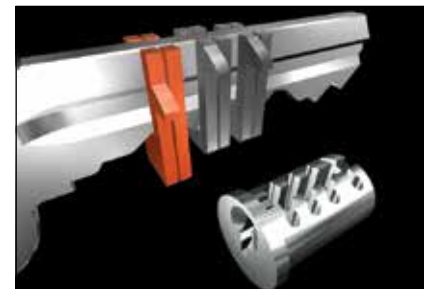

From...   **To...**

The ASSA ABLOY Key Gauge, provided in the CYL4® Keying Kit, allows fast and accurate determination of the key code.

The patented CYL4® cylinder has been designed to retain its wafers when the key is removed. This makes re-keying the CYL4® cylinder quick and easy for retailers and locksmiths alike.

There are 10 CYL4® wafers numbered 0-9, that cover the 10 depths of a C4 key. Six wafers are arranged in pairs to match the first 3 cuts of the customer's key.

Using the CYL4® Keying Kit, you can re-key any ASSA ABLOY CYL4® window lock or patio bolt to the customer's C4 key in just a few minutes. EASY!

10 YEAR MECHANICAL WARRANTY

CYL4® Lockable Chainwinder

Application / Description

Chain type operator provides CYL4® locking for awning windows.
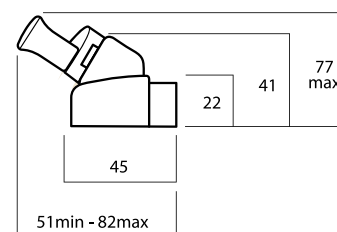

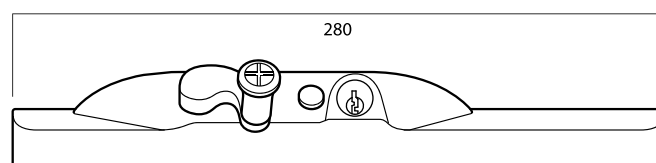

Features and Specifications

- CYL4® One Key Security – Can be matched to most door and window locks for one key convenience

- Suits aluminium or timber awning windows with butt or hook hinges, or non friction stays

- Smooth operation

- Through flyscreen operation

- Push button to lock, key to unlock

- Less than 1mm between locking points

- Maximum opening 300mm, 19 handle turns to fully open

- Can be wound closed when locked

- Retrofits existing MK7 and MK8 Whitco chainwinder models

- Foldable knob in handle reduces width preventing damage and interference with blinds

- Zinc diecast body and mechanism, passivated zinc steel base plate and passivated zinc steel chain

- Corrosion resistant version available with stainless steel chain and stainless steel base plate

- Retail pack has printed instructions on sealed poly bag, opening restriction clip, standard and one-way fixing screws and sash security fixing brackets

- Exceeds the requirements of Australian window lock standard AS4145.3 – 2001 level DW2SW2

- The chain can be restricted to either 100mm or 150mm opening length via fitment of a restrictor clip in the base of the chain winder mechanism. The fitment of the restrictor clip assists the window to comply with Building Code Australia requirements D2.24 Protection of Operable Windows

- Available in retail and trade packs

Keying

- CYL4® cylinder - Can be Keyed Alike to all door locks that use a 5 pin key with a C4 profile, and to CYL4® window locks

- Two Whitco keys included
